

## Banque de Luxembourg Headquarters

The first phase of the 27,000m<sup>2</sup> project involved the design of a 15,000m<sup>2</sup> corporate headquarters for a bank in downtown Luxembourg, at the focal point of the financial district with 16th, 17th, 18th and 19th century buildings. The building is developed within a tight envelope defined by zoning regulations. The building has eight levels below ground and six levels above ground and contains an auditorium, trading rooms, a vault, a computer center, meeting rooms/classrooms and dining areas.

The recently completed Phase 2 expansion is a 12,000m<sup>2</sup> extension of the original 15,000m<sup>2</sup> Banque de Luxembourg Headquarters building. The expansion has seven floors above grade and four below grade. It was built to accommodate the bank's growing sales team.
