

Ripple Bench

The Ripple Bench was designed for Coalesce, an American furniture company that encourages collaboration. The sculptural, fully upholstered bench can be used in two orientations, flat or wave seating. The bench comes in four configurations, the wave seat, flat seat, little ripple wave seat and little ripple flat seat single. Height adjustable leveling glides with stainless steel finish. The articulating waveform of the bench makes it ideal for large lobby areas in hotels, banks, museums or convention centers.
